HUMAN BIOLOGY
RESEARCH ETHICS
COMMITTEE

Professor L Hall
Department of Chemical Engineering and Biotechnology
University of Cambridge

26 May 2021

Application No: HBREC.2021.13

Dear Professor Hall

COVID-19 Diagnostics for Africa (AfriDx)

I am pleased to let you know that the Human Biology Research Ethics Committee has agreed to give ethical approval for your research project *COVID-19 Diagnostics for Africa (AfriDx)* submitted on 18 May 2021.

The Committee attaches certain standard conditions to all ethical approval. These are:

- (a) that if the staff conducting the research should change, any new staff should read the application submitted to the Committee for ethical approval and this letter (and any subsequent correspondence concerning this application for ethical approval). An amendment request should also be submitted (guidance at www.bio.cam.ac.uk/psyres/amendments);
- (b) that if the procedures used in the research project should change or the project itself should be changed you should consider whether it is necessary to submit a further application for any modified or additional procedures to be approved;
- (c) that if the employment or departmental affiliation of the staff should change you should notify us of that fact.

The Committee also asks that you inform members of any unexpected ethical issues.

Ethical approval will expire on 31 March 2022. If you require an extension, please submit an amendment request before the expiry date.

If you will let me know that you are able to accept these conditions, I will record that you have been given ethical approval.

Yours sincerely

Milly Bodfish
